
— Call for Papers —
Annals of Operations Research
Special Volume
Operations Research for Neuroscience III

After the positive and encouraging response by the scientific and wider community to the previous two special volumes *Operations Research for Neuroscience* and *Operations Research for Neuroscience II*, the journal **Annals of Operations Research (Springer)** now invites submissions of papers to a third special volume on the same subject, called **Operations Research for Neuroscience III**.

Neuroscience is a multidisciplinary science that is concerned with the study of the structure and functions of the nervous system. It comprises aspects of physiology, cellular and molecular biology, as well as behavioral and cognitive science. Recent technological and theoretical advances offer promising opportunities for better understanding of the nervous system at the quantitative level. New optogenetic, in vitro and in vivo multielectrode recording, neuroimaging, brain imaging, and other modern techniques provide high-quality data that can be used in elucidating the fundamental mechanisms of information processing in the nervous system.

The rapidly growing pool of experimental data has triggered the development of new mathematical models, which can provide new insights into the functioning of the nervous system at various scales, ranging from that of molecular biology to that of the organizational principles of behavior and cognition. Sophisticated analyses of intracellular signaling or dynamics in heterogeneous neural networks, conditional behavior or connections of brain regions in decision-making lead to theoretical problems, addressed by Operations Research.

Although, Operations Research is actively used in bottom-up approach: from experimental observation to consistent theory; it is also has wide overlapping with modern and rapidly developing formal theories, for example the Free-Energy principle, the Integrated Information theory and may others.

The special volume will cover a broad range of topics in the field of neuroscience, which use Operations Research approaches, methods and theories. Potential topics include, but are not limited to, the following areas and methodologies of *neuroscience*:

- intracellular signaling and regulation,
- synaptic plasticity,
- dynamics in heterogeneous neural networks,
- intelligent systems and control, hybrid systems and regime switching models,
- neuronal and neural generalized Turing machine models,
- perceptual, cognitive and behavioral functions,
- learning and memory,
- spatio-temporal network analysis,
- behavioral economics and finance,
- linguistics and cognition,
- combinatorial optimization,
- signal and information processing,

- neuroimaging and functional brain imaging processing,
- computational modeling and simulation,
- formal theoretical approaches: the Free-Energy principle, the Integrated Information, Bayesian inference,
- foundations of Analytics and Artificial Intelligence, etc.

The use of methods from modern *Operations Research* in *Neuroscience* is a prerequisite for any paper submitted to this special volume to enter the reviewing process.

Annals of Operations Research is abstracted and indexed in the following databases: Science Citation Index, Science Citation Index Expanded (SciSearch), Journal Citation Reports/Science Edition, SCOPUS, INSPEC, Zentralblatt Math, Google Scholar, EBSCO, CSA, ProQuest, ABS Academic Journal Quality Guide, Academic OneFile, Academic Search, Computer Abstracts International Database, Computer Science Index, CSA Environmental Sciences, Current Contents/Engineering, Computing and Technology, DBLP, ECONIS, Expanded Academic, International Abstracts in Operations Research, Mathematical Reviews, OCLC, SCImago, STMA-Z, Summon by ProQuest.

The Special Issue is officially endorsed by **IFORS 2020**, Seoul, South Korea.

Guest Editors: Ruben A. Tikidji-Hamburyan, Erik Kropat and Gerhard-Wilhelm Weber.

Important Dates: Submission deadline of full papers: December 1, 2020.

Submission Details: The format of manuscripts for the *Annals of Operations Research* as well as guidelines can be found on the web page of Springer, the publisher of the journal: <http://www.springer.com/journal/10479/submission>. Authors should submit a cover letter mentioning that the paper is for a special volume and a manuscript via the journal's online submission site: <http://www.editorialmanager.com/anor>. When prompted, please select the article type “**S.I.: OR in Neuroscience III**”.

All papers submitted for publication will be carefully refereed. In case of any question please contact by e-mail one of the following guest editors:

Dr. Ruben A. Tikidji-Hamburyan
School of Medicine and Health Sciences
George Washington University
Washington, District of Columbia, 20006, USA
E-mail: rath@gwu.edu

Dr. Erik Kropat
Department of Computer Science
Universität der Bundeswehr München
Werner-Heisenberg-Weg 39
85577 Neubiberg, Germany
E-mail: erik.kropat@gmx.de

Prof. Dr. Gerhard-Wilhelm Weber
Faculty of Engineering Management
Chair of Marketing and Economic Engineering
Poznan University of Technology
ul. Strzelecka 11
60-965 Poznan, Poland
E-mail: gerhard.weber@put.poznan.pl
